The content provides insights for a cybersecurity student about the U.S. government's Cybersecurity and Infrastructure Security Agency (CISA). Here are some key actionable insights:

1. Secure .gov websites use HTTPS: A lock icon or https:// in the website URL indicates a secure connection to an official government organization. Share sensitive information only on such websites.

2. Free Cybersecurity Services and Tools: CISA offers several resources for cybersecurity, including free services and tools. Some of these are Secure by Design, Secure Our World, Shields Up, and Report A Cyber Issue.

3. Stay informed about news and events related to CISA: The agency publishes articles, press releases, advisories, and hosts/participates in various events. Keep an eye on their website for the latest updates.

4. Alerts & Directives: Be aware of CISA's alerts and directives. These provide information about vulnerabilities, threats, and mitigation strategies that can help secure networks and systems.

5. Upcoming Events: Check out upcoming events hosted or participated by CISA to learn more about cybersecurity-related topics, including webinars on active shooter preparedness.
